

# Build and Manage an AKS Cluster

---

**Ben Weissman**

Data Passionist

@bweissman [www.solisyon.de](http://www.solisyon.de)

# Overview

**General Deployment Process**

**Ways and Tools To Create an AKS Cluster**

**Communicating With Your AKS Cluster**

**Manually Scaling an AKS Cluster**

**Deploying a Windows Cluster**

# Prerequisites

**Azure Subscription**

**Administrative Workstation**  
(Windows, Mac, Linux)

# General Deployment Process

## Mandatory Parameters

Name

Resource Group

## Deployment Tools

Azure Portal

Azure CLI

PowerShell

ARM Template

## Process in Background

### Resource Group

AKS Cluster

### Managed Cluster Resource Group

Node Pool

VM

VM

VM

VM

Load Balancer

NSG

Public IPs

Public IPs

Storage

Storage

# Most Common Optional Parameters

**SSH Key value or generate SSH Keys**

**Kubernetes version**

**Node VM size (Default: Standard\_DS2\_v2)**

**Node count (Default: 3)**

**VNet subnet ID**

# ARM Templates with Bicep

.bicep files can be deployed directly through PowerShell and Azure CLI

<https://github.com/Azure/bicep/>

## JSON

```
"parameters": {  
  "clusterName": {  
    "type": "string",  
    "defaultValue": "akscluster"  
  },  
  "agentCount": {  
    "type": "int",  
    "defaultValue": 3,  
    "minValue": 1,  
    "maxValue": 50  
  },  
  "agentVMSize": {  
    "type": "string",  
    "defaultValue": "Standard_DS2_v2"  
  },  
  "sshRSAPublicKey": {  
    "type": "string"  
  }  
}
```

## Bicep

```
param clusterName string = 'akscluster'  
  
@minValue(1)  
@maxValue(50)  
param agentCount int = 3  
param agentVMSize string = 'Standard_DS2_v2'  
param sshRSAPublicKey string
```

# Demo

## Create an AKS Cluster Using ARM Templates

# Communicating with Your AKS Cluster

```
az aks get-credentials
```

Merge

Set as current context

~/.kube/config

# Demo

## Communicating with Your AKS Cluster

# Manual Scaling an AKS Cluster - Pods

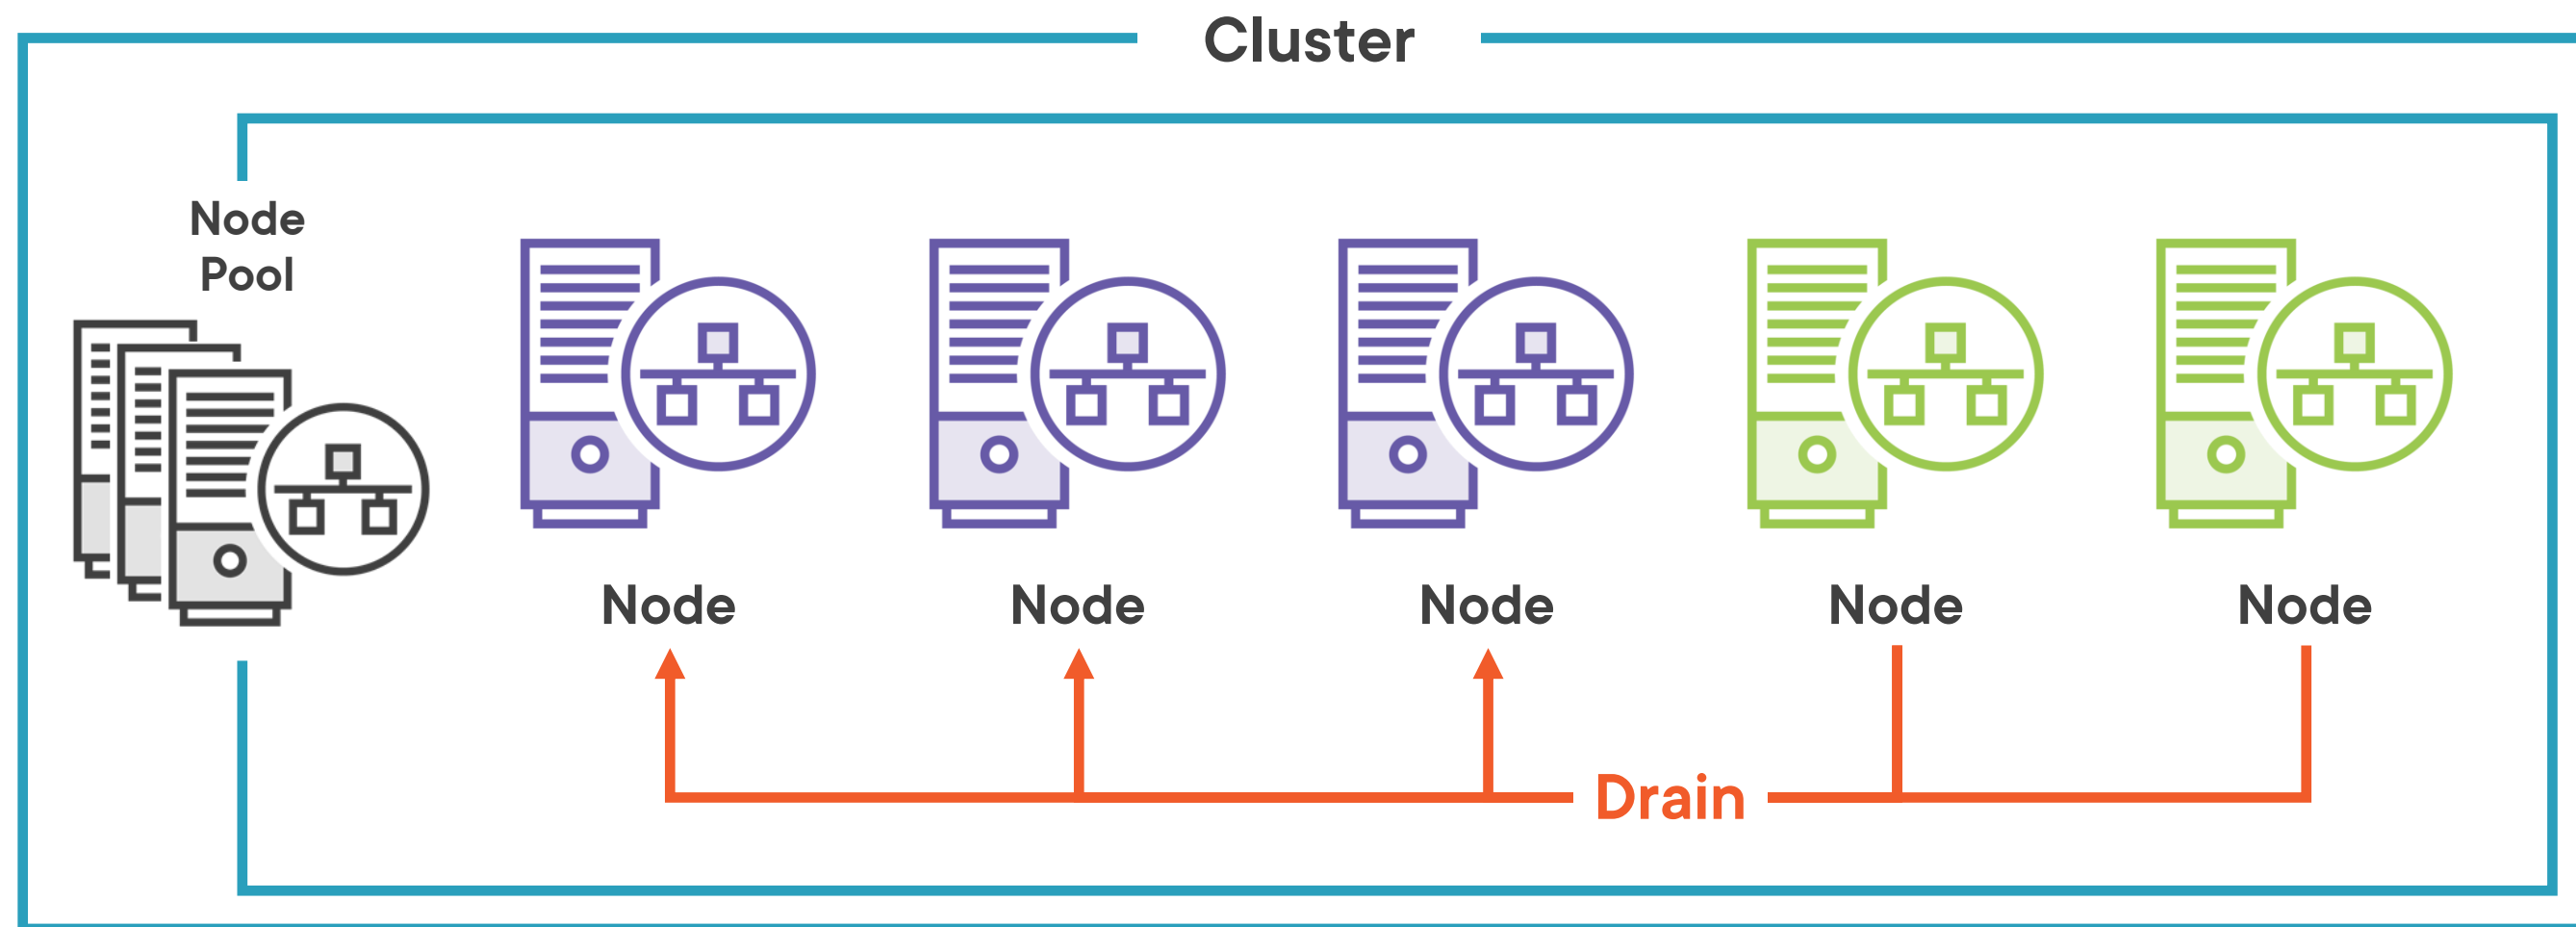

```
kubectl scale <Pod> --replicas=4
```

# Manual Scaling an AKS Cluster – Node Count

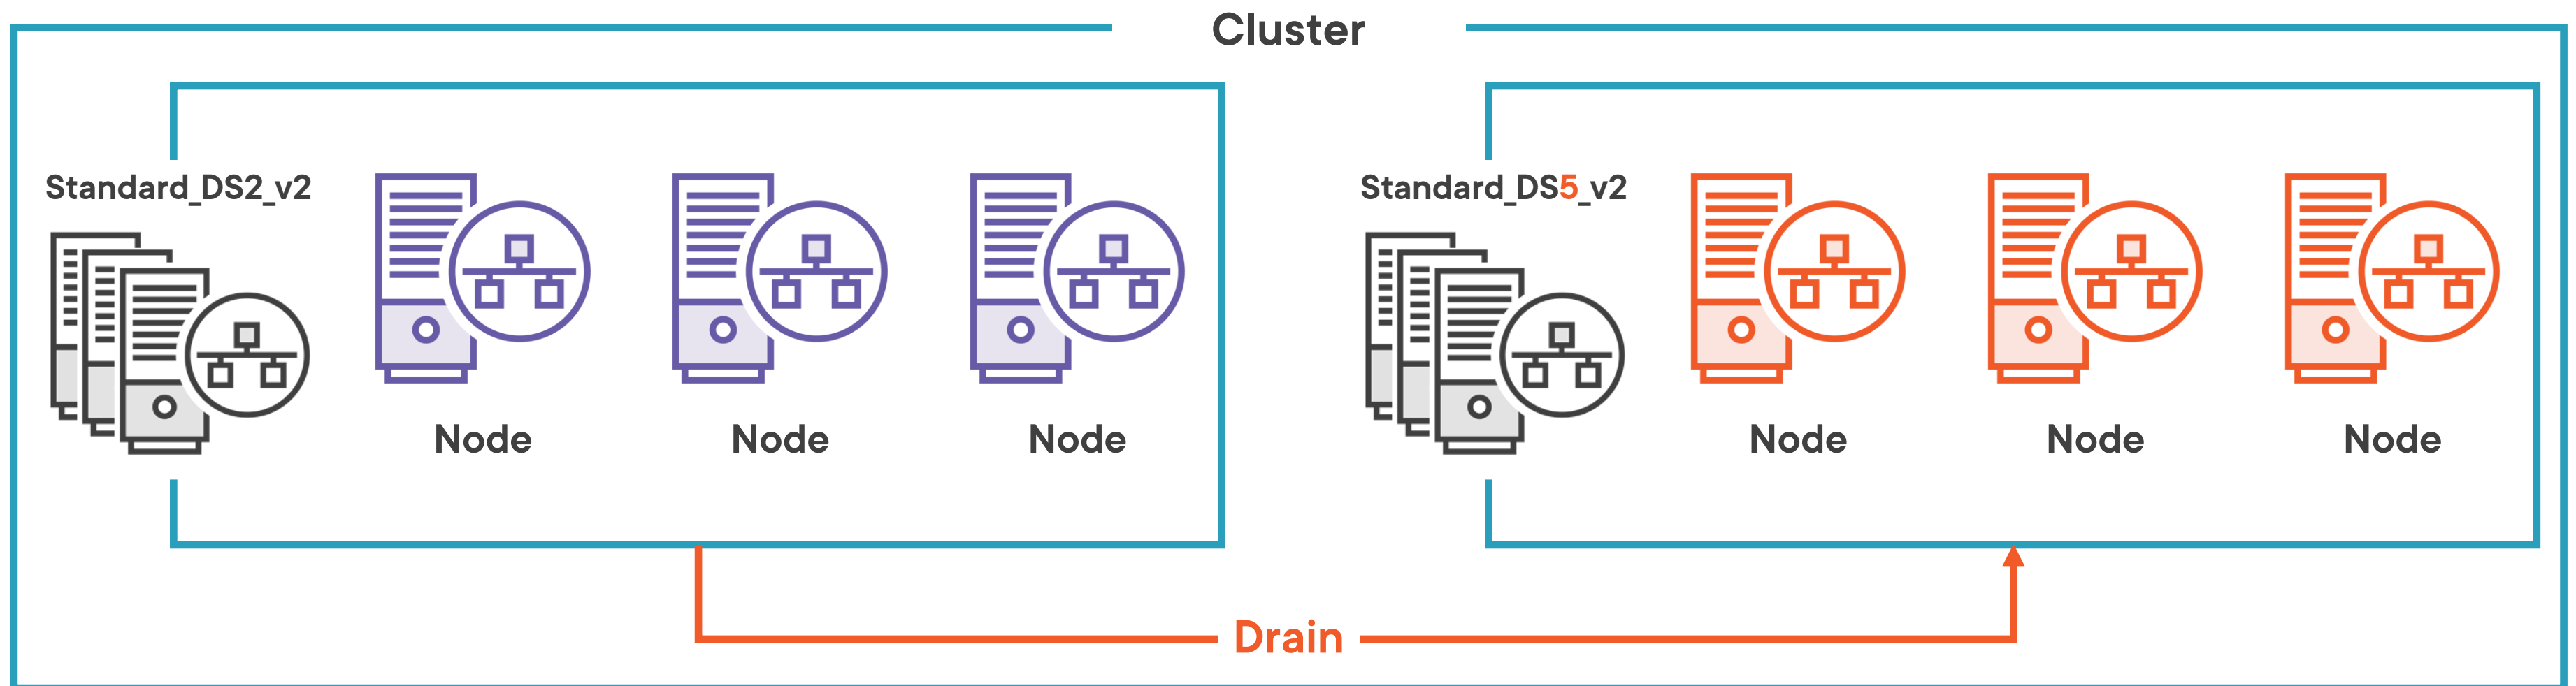

Red Nodes are through Deployment Tool  
Blue Nodes are through Deployment Tool

Be considerate of workloads when scaling down!

# Manual Scaling an AKS Cluster – Node Size

# Demo

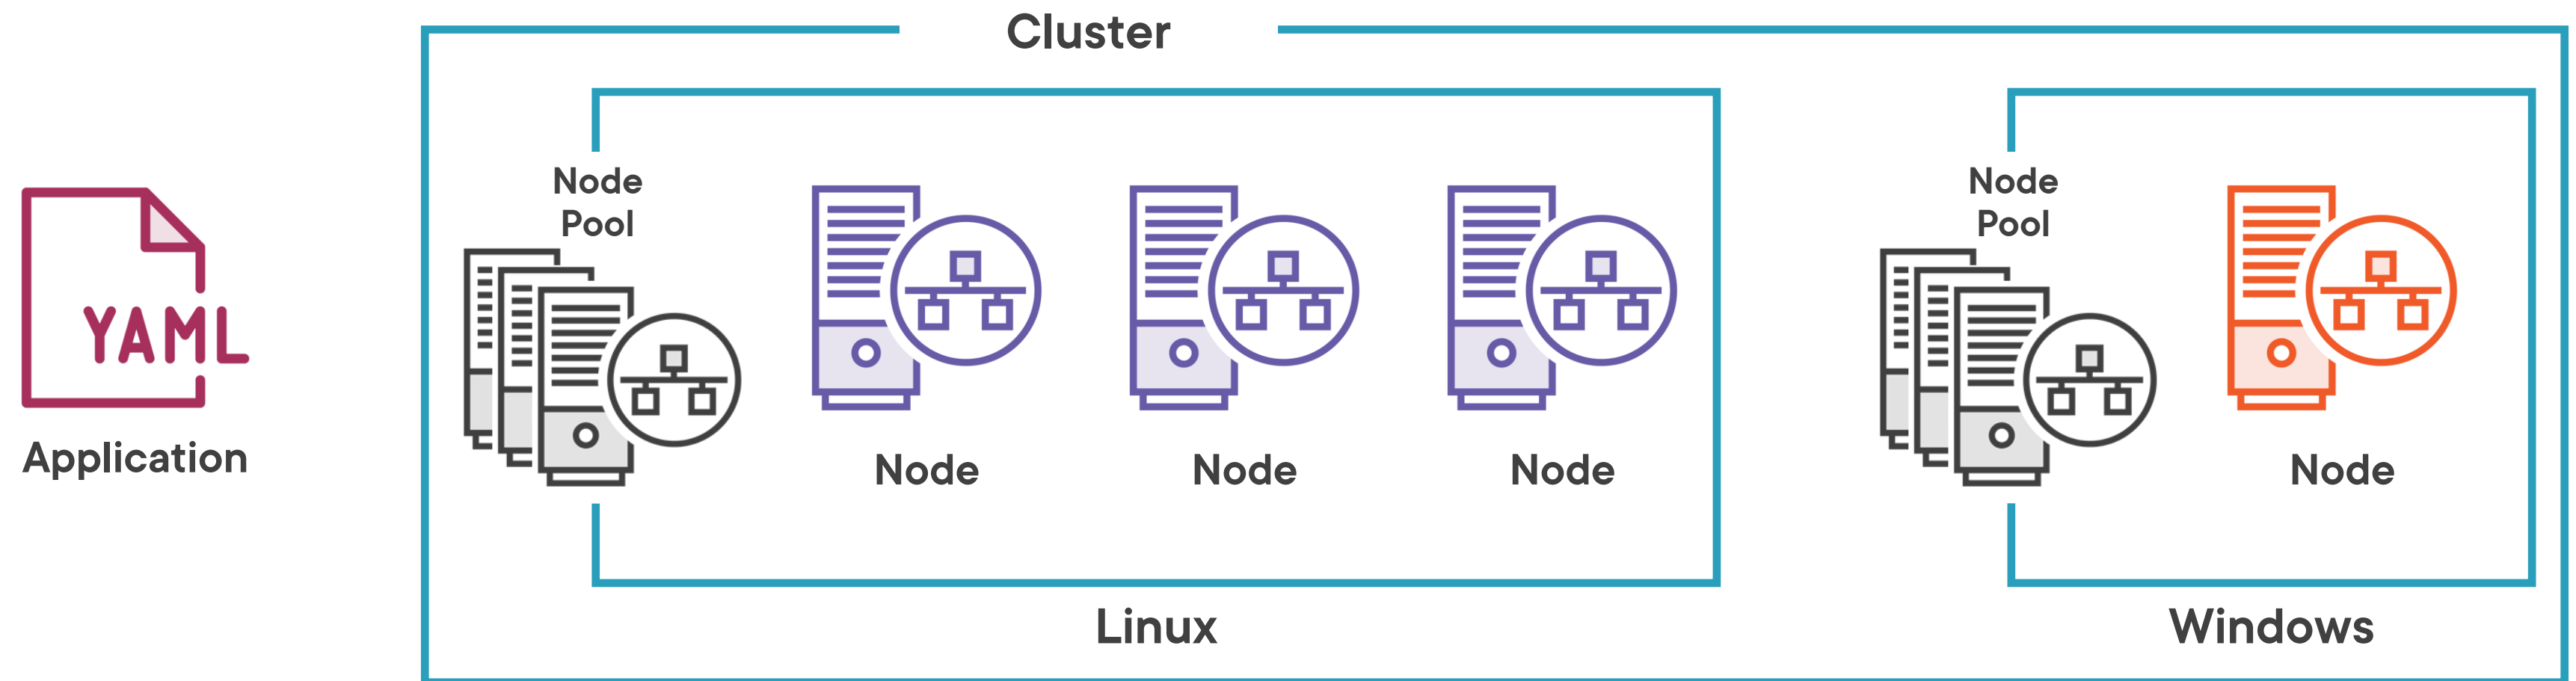

**Scale Up Node Count Through Azure Portal**

**Scale Down Node Count Through Azure  
CLI**

# Windows Node Pools

```
...  
spec:  
  nodeSelector:  
    "beta.kubernetes.io/os": windows  
...
```

# Demo

## Deploy a Windows Node Pool

## Summary

**AKS Creates an Extra RG per Cluster**

**AKS Can Be Deployed Through the Azure Portal, Azure CLI, Azure PowerShell and ARM Templates**

**Communication Runs Through kubectl**

**AKS Clusters Can Be Manually Scaled**

**Windows Node Pools Are Also Supported**
